

BELAYNESH KNDIE

Jyväskylä, Finland | tslatebely@gmail.com | +358 46 634 7802 | [GitHub](#) | [LinkedIn](#)

PROFILE

Software engineer and MSc graduate in Brain and Data Science with research experience in machine learning, multimodal data analysis, medical imaging, and scientific computing. Experienced in developing machine learning workflows and software applications for data-driven tasks. Interested in AI systems for biomedical applications and software that supports medical imaging research.

SKILLS

Programming: Python, JavaScript/ TypeScript, Java, C#, C++

AI & Data Science: Machine Learning, Deep Learning, Multimodal Learning, PyTorch, LLM APIs, Statistical Analysis

Software engineering & Data: Node.js, PostgreSQL, SQL, REST APIs, Data Pipelines

Tools & Environments: Git, Linux, Docker, Azure, MNE-Python

EXPERIENCE

AI Research Intern (Remote) | Haqila Research Lab

Jun 2026 – Present

- Developing multimodal machine learning models integrating epidemiological and image data.
- Designing preprocessing and data integration pipelines for heterogeneous biomedical datasets.
- Developing and evaluating AI models using Python for prediction and decision-support applications.

MSc Thesis Researcher | University of Jyväskylä

Aug 2025 – June 2026

- Designed and implemented end-to-end machine learning pipelines for multimodal experimental data collected from human studies.
- Developed reproducible workflows for preprocessing, feature engineering, and predictive modeling.
- Evaluated multiple machine learning models using subject-independent validation strategies.

Web Developer | Eyu-Ethiopia

Nov 2022 – Oct 2024

- Developed and maintained organizational web applications supporting operational workflows.
- Improved system reliability, usability, and performance through debugging and continuous updates.
- Worked with backend services, databases, and web applications supporting organizational operations.

Assistant Lecturer | Bahir Dar University

Oct 2021 – 2024

- Assisted in teaching programming and software engineering courses.
- Supported students in software development projects and laboratory sessions.

Software Engineering Intern | Ethiopian Airlines

Oct 2019 – Jan 2020

- Developed and tested software components using C# and .NET Core under supervision.
- Supported software development activities within the IT department.

PROJECTS

Deep Learning for Alzheimer's Disease Classification from Brain MRI | Python, PyTorch, NiBabel, Nilearn

- Developed a deep learning pipeline for Alzheimer's disease classification using structural brain MRI
- Worked with 3D NIfTI MRI volumes and examined image dimensions, voxel characteristics and intensity distributions to prepare the data for modelling.

Multi-Agent Job Application Assistant | Python, CrewAI, Hugging Face API

- Designed and implemented a multi-agent AI application using CrewAI and Hugging Face APIs for automated job-description analysis, CV evaluation, and tailored document generation.
- Integrated LLM APIs into modular agent workflows supporting reasoning and task orchestration.

Waste Classification REST API | Flask, TensorFlow, ResNet50

- Developed a RESTful image-classification service using TensorFlow, Flask, and transfer learning (ResNet50).
- Designed API endpoints for model inference and automated waste-material classification.

Eye Health Referral Management System | Vue, PostgreSQL, Web Development

- Developed and maintained web-based information management features using Vue and PostgreSQL.
- Supported workflow automation, data management, and communication between system users.

EDUCATION

Erasmus Mundus MSc in Brain and Data Science | University of Jyväskylä, Finland & Bar-Ilan University, Israel 2024 – 2026

- Relevant coursework included machine learning, deep learning, statistical learning, computational neuroscience, Medical Imaging, cloud computing, and software engineering.

International Summer School Program | University of Zagreb, Croatia Jun – Jul 2024

- Participated in interdisciplinary coursework covering data science and neuroscience topics.

BSc Software Engineering | Bahir Dar University, Ethiopia 2016 – 2021

- Covered programming, data structures, databases, and software development fundamentals.

TRAININGS & CERTIFICATIONS

Full-Stack Software Development Training | Minab Tech + Bahir Dar Institute of Technology May – Jul 2023

- Completed an intensive program covering modern frontend and backend development.
- Built applications integrating JS frameworks, PostgreSQL databases, and GraphQL APIs.

BCI & Neurotechnology Spring School | g.tec medical engineering Apr 20 – 29, 2026

- Completed intensive training in Brain-Computer Interfaces and human-computer interaction
- Participated in the BR41N.IO Hackathon developing an interactive EEG-based educational application

LANGUAGES

English — Professional working proficiency

Amharic — Native
